

#### Castlefield School- Maths

Topic: Money Year: Two Theme: Measurement

# Key concepts and questions

## What is the total cost?

To find the total cost, you need to add the Relevant amounts.

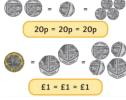

### How much change?

To find how much change you receive, you need to find the difference (subtract).

# What other coins can make the same amount?

Different combinations of coins can be used to make the same amount of money.

Key Vocabulary	
Money	How we pay for things. In the UK we have pounds and pence.
Pounds (£)	One pound equals 100 pence
Total	How much it costs altogether.
Change	The difference between the total cost and how much money is paid.
Price	How much one item costs.

#### Representations

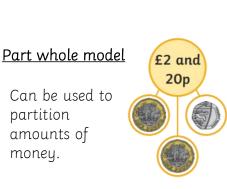

## Bar model

partition

money.

£1 80p

Helps with finding total cost and change given. This bar model represents £1 - 80p

### 5p 1 pence 2 pence 5 pence 10p 20p 50p

# Making connections

> < and = can be used to compare amounts of money

= 30p

74p

tens

ones

Use knowledge of counting in 1s, 2s, 5s and 10s to help with adding and subtracting money.

10 pence 10 pence 10 pence
